Expertly trained and experienced, Dr. Suneetha Budampati is the medical director of NSPC Arlington. She strives to achieve a comprehensive understanding of the overall condition and create a customized care plan with each patient. Embodying her treatment philosophy, she is mindful of the unique individual effect of both chronic and acute pain on each patient.

Born into a family of physicians, her lifelong immersion in the practice of medicine created a deep appreciation of the doctor-patient relationship and the profoundly positive impact of a successful treatment, not only on the patient but also on their family and social functioning.

Her expertise includes spinal injections, nerve blocks, percutaneous intradiscal therapies, neuromodulation at the dorsal column, DRG, peripheral nerves, MILD procedure, SCS implantation, revision and pain pump therapies. She is also an experienced provider of balloon kyphoplasty and Botox chemodeneration for migraines and dystonia.

She is board certified in interventional pain management and PM&R, and she maintains active memberships in the American Society of Interventional Pain Physicians and the American Academy of Physical Medicine and Rehabilitation.

An advocate for strong patient involvement, Dr. Budampati achieves successful results by dialoguing with patients to fully appreciate their expectations and keep them actively engaged in their treatment program. "I will offer the care and expertise," she says, "but you offer me your interest and participation so that we can come up with a progressive prevention plan for your future".
